Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-18 consist solely of capturing information simply manipulates abstract ideas without practical application in the technological arts. The language of the claims 1-18 raises a question as to whether the claimed method is directed merely to an abstract idea that is not tied to a technological art, environment, or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 USC 101. Claims 1-18 is simply transferring data of program with out any significant output.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2125

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Phillips et al. (US 2006/0129627).

Regarding claims 1-18, Phillips discloses that first and second data storage and data transfer from and to (Fig. 1 and Fig. 3), an interface receiving the data object and mapping data fields in the data object into a first data type (Fig. 2), checking if the data is not available (Fig. 8).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
